

turbolava®

the World's Best Grout Cleaning Machines

That is because of our special twin brush design and powerful vacuum system.

Our 2 level, 360 degree, 550rpm rotation cleans right to left and front to back.

This design out-cleans regular brushes, pads and cylindrical brushes by a mile on all floors.

Plus, the turbolava® vacuum system picks up all of the soil and water.

Your floor is clean and dry and safe.

turbolava® cleans where the big guys can't and remember "You can not mop a floor clean".
